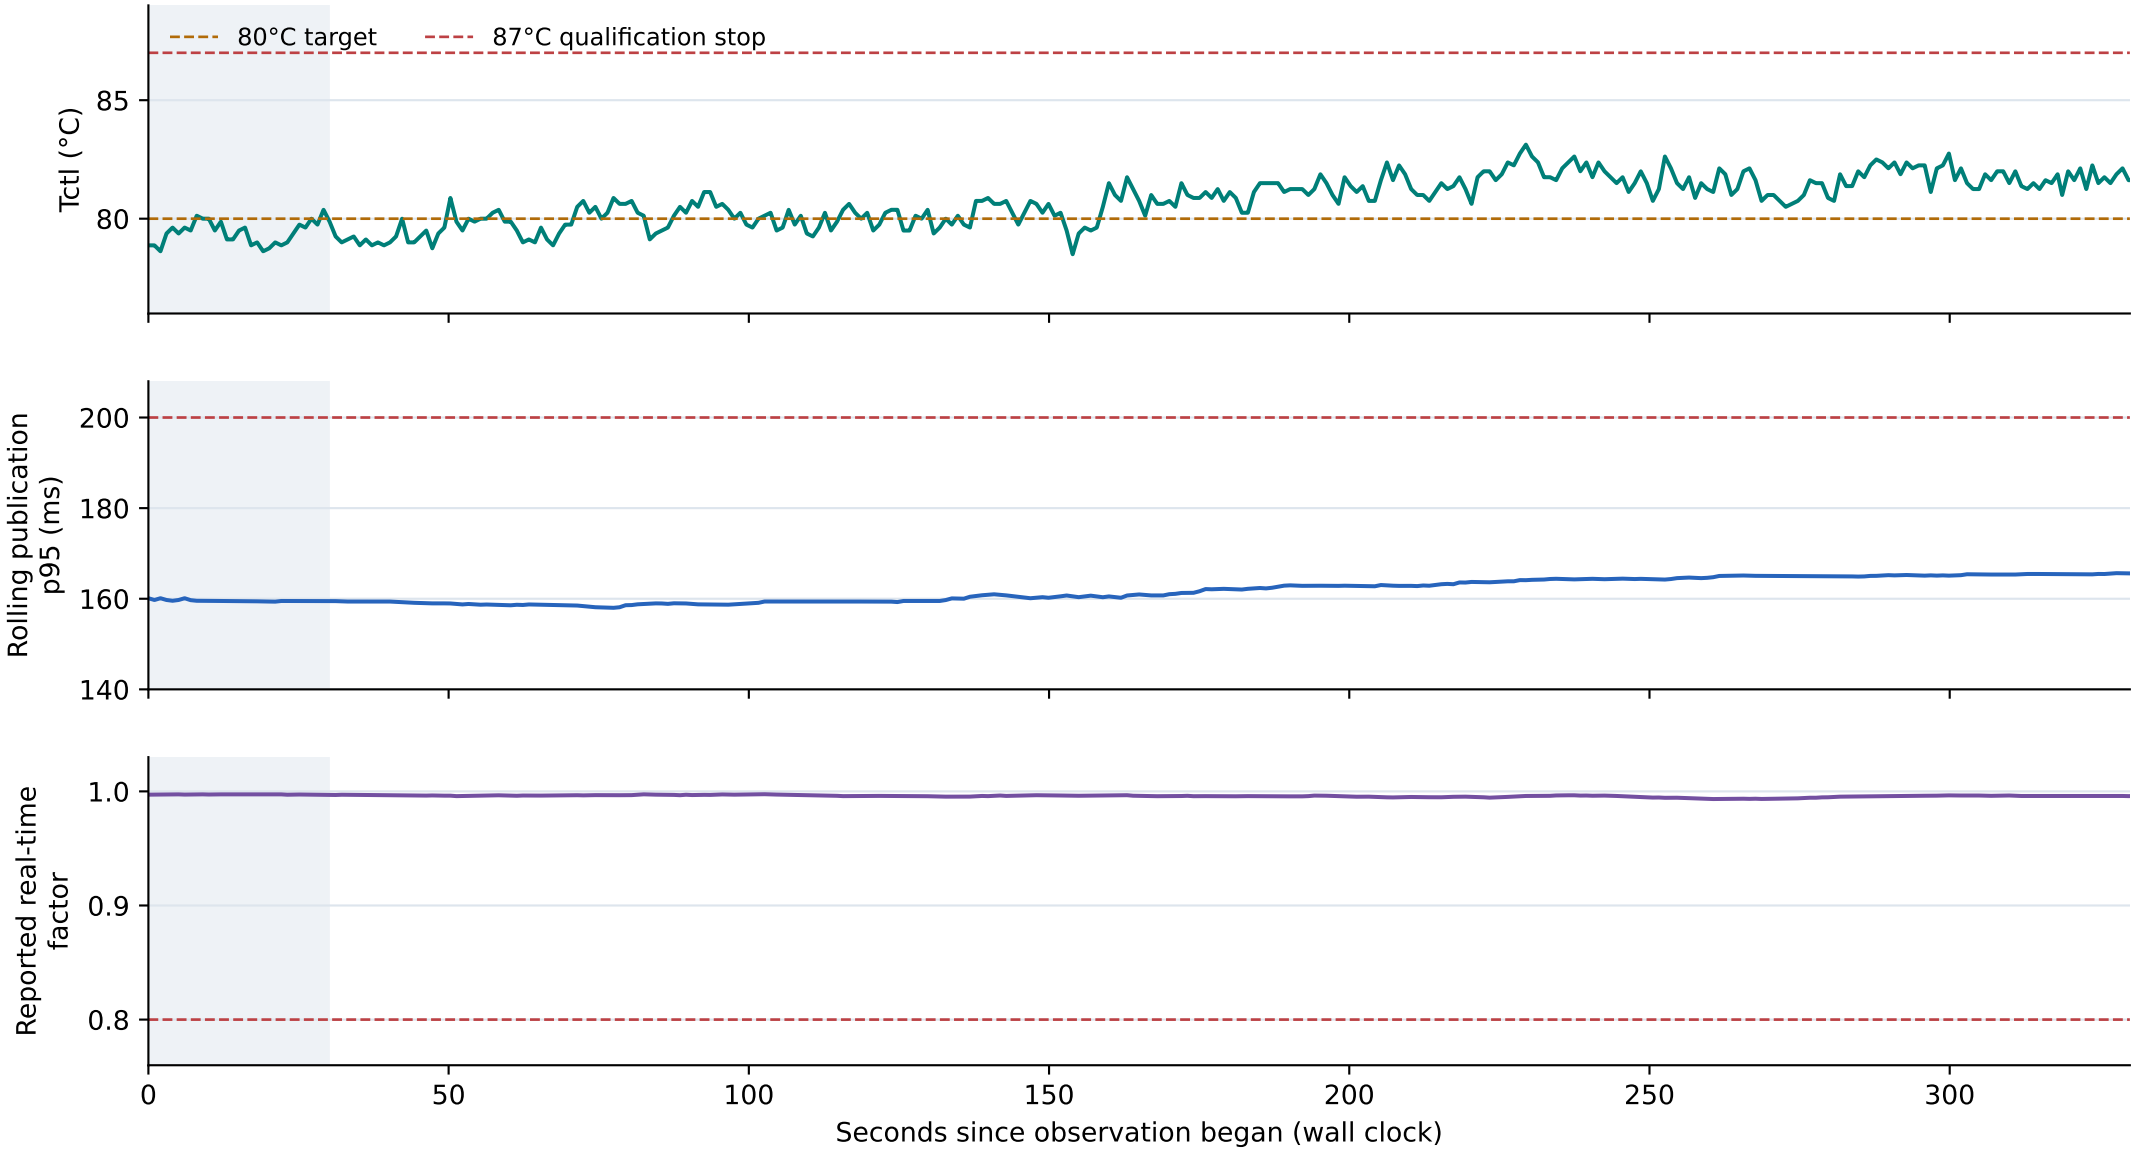
Gazebo GUI-off: stationary browser mapping

November 10, 2026 | 30 s warm-up + 300 s observation | Ogre RGB-D at 15 Hz



Steady readings: mean 80.82°C, peak 83.12°C; worst rolling p95 165.65 ms; median RTF 0.996.

Below-80°C target not met. No matched baseline; no autonomous or endurance acceptance.

Rover stayed stopped. Historical startup odometry fault retained; current inputs were healthy.
